What is the relation between science and technology and in what way are design processes similar to and different from investigative processes in natural science? (for example, Bunge, 1966). This approach to philosophy of technology is closely related to philosophy of science, where also much attention is given to methodology and epistemology.

Beam Hardening. An x-ray beam is composed of individual photons with a range of energies. As the beam passes through an object, it becomes "harder," that is to say its mean energy increases, because the lower-energy photons are absorbed more rapidly than the higher-energy photons (, Fig 1).Two types of artifact can result from this effect: so-called cupping artifacts and the appearance of ...
